Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I want my credit card application to be approved quickly. • I hope my credit score is good enough. • The approval process should be transparent.	THINKS • Will my application be rejected? • What factors affect my approval? • Can I improve my chances of getting approved?
PERSONA NAME Credit Card Applicant <i>(Role / UserType)</i>	
DOES • Checks credit score before applying. • Uploads required documents. • Compares different credit card offers. • Waits for the approval decision.	FEELS • Anxious about approval. • Confused by eligibility criteria. • Hopeful after submitting all documents. • Happy when the application is approved.
